

Attorney Docket No. 1466.1017

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Patent Application of:

Katsuya IRIE, et al.

Application No.: 09/722,697

ATTENTION

Confirmation No.: 4563

CERTIFICATE OF CORRECTION

Filed: November 28, 2000

BRANCH

U.S. Patent No.: 6,909,225

Batch No.:

Issued: June 21, 2005

For: GAS DISCHARGE DISPLAY DEVICE

Certificate

REQUEST FOR CERTIFICATE OF CORRECTION

JUL 27 2006

of Correction

Commissioner for Patents
PO Box 1450
Alexandria, VA 22313-1450

Sir:

Patentee(s) respectfully request(s) that a Certificate of Correction be issued in the subject patent, pursuant to 35 U.S.C. §254 and 37 C.F.R. §1.322, to correct the mistake(s) shown on the attached Form PTO-1050.

On the Notice of Allowability mailed on February 8, 2005, the Examiner allows claims 1-3, 7 and 9-12, which is a total of 8 allowed claims. However, the issued patent only reflects 7 allowed claims. In light of the above, the Patentee respectfully requests that the allowed, but missing claim 12 be incorporated into the issued patent.

Since the mistakes are Patent Office mistakes, it is believed that no fee is required.

Respectfully submitted,

STAAS & HALSEY LLP

Date: July 25, 2006

CERTIFICATE OF CORRECTION

PATENT NO : 6,909,225

DATED : June 21, 2005

INVENTOR(S) : Katsuya IRIE, et al.

Column 9, line 47, after "material" change "In" to --in--;

Column 12, after claim 7, insert claim 8 as follows:

A gas discharge display device that reproduces a color of each pixel of a color image by controlling respective light emission quantities of three kinds of cells having different light emission colors, the device comprising:

- a discharge gas sealed in the three kinds of cells;
- a first fluorescent material in a first of the three kinds of cells emitting a red light;
- a second fluorescent material in a second of the three kinds of cells emitting a green light;
- a third fluorescent material in a third of the three kinds of cells emitting a blue light;
- a filter located at a front side of the three kinds of cells;
- a first mixed color of the respective light emissions of the first fluorescent material, the second fluorescent material and the third fluorescent material, when reproducing a white color under a condition of a display load factor at 10%, being a color defined by first chromaticity coordinates in which a deviation from a blackbody locus is generated in a chromaticity diagram and a second mixed color of the first mixed color and a light emission color of the discharge gas, when reproducing a white color under a condition of a display load factor at 10%, being a color defined by second chromaticity coordinates in which a deviation from the blackbody locus is generated in the chromaticity diagram; and

the filter converts the second mixed color into a color having a higher color temperature than the second mixed color, defined by third chromaticity coordinates that are closer to the blackbody locus than the second chromaticity coordinates of the second mixed color and in which a negative deviation from the blackbody locus is generated.
